Advanced Lithium Battery - Communication Cable Guideline. There are three types of cable connections: Cable 1 - Battery to RV-C Network Connection . Cable 1 is used to connect the battery to the main RV-C network, our GP-Display or Firefly/Main RV-C network. If you are only using batteries, this cable is not needed.

Plug the data cable into a free pin connector ComSync on the Sunny Island (> Connecting the Data Cable). Connect the other end of the data cable to the battery management of the lithium-ion battery (see battery manufacturer documentation). Ensure that the CAN communication bus is closed at each end, e.g. with a terminator.

Justrite's Lithium-Ion battery Charging Safety Cabinet is engineered to charge and store lithium batteries safely. Made with a proprietary 9-layer ChargeGuard(TM) system that helps minimize potential losses from fire, smoke, and explosions caused by Lithium batteries.
