

Electric energy storage charging piles for sale in Estonia

The Estonian energy company Alexela is speeding up the development of Estonia's charging infrastructure by installing 400 kW superchargers. The charging speed of electric car chargers of such power is comparable to the filling time of liquid fuels. The first charger of this kind will be installed on the roadside of Via Baltica.

Eesti Energia is all set to install its first utility-scale energy storage system in Estonia. This has been followed by a competitive tender for providers in 2023. The storage facility will be installed at the Auvere industrial complex later this year. According to the company, the investment in the 26.5MW/53.1 megawatt hour battery ...
