300 MWh is perhaps big or even "huge" for a battery storage but not generally for storing energy. 300 MWh is about the energy that a typical nuclear power plant delivers in 20 minutes. A modern pumped hydro storage, for example (Nant-de-Drance, Switzerland), stores about 20 GWh (with turbines for 900 MW) what is about 67 times the 300 MWh.
