

# How much does the new energy battery all-in-one machine cost

How much does a GivEnergy battery cost?

This can help any homeowner maximize their savings on their energy bill. How much is the GivEnergy all in one battery cost? At Deege Solar we install the GivEnergy 13.5kWh battery at a price of £11,995 (including VAT). This includes the certification, commissioning, monitoring setup, and full installation cost.

How much does the GivEnergy all in one cost?

GB Solar are currently running a promotional price on the full installation and commissioning of the GivEnergy All in One at £6,450. This includes a full handover with our experienced engineers, monitoring portal set up, electrical certification and DNO permission. The GivEnergy All in One: What options do I have?

How much does an all in one battery save a year?

Based on these smart tariff optimisations, households installing the All in One battery typically save £1,500 per year on energy bills or 85% versus standard rates. Your specific savings will depend on factors like household demand, solar system size and your electricity tariff terms.

What is the capacity of the all in one battery?

With a total capacity of 13.5kWh and 100% depth of discharge, homeowners can access the battery's full potential. Designed for indoor and outdoor installation, the All in One battery is IP65 rated making it weatherproof and protected from dust and moisture. Its modular construction also ensures straightforward handling and maintenance.

What is the all in one battery system?

The All in One is compact, robust and flexible. It offers the option to connect multiple units (up to 6 batteries in parallel) enabling you to add as your energy needs grow. Its durable design also means it can be installed both indoors or outdoors.

What is GivEnergy all in one battery?

The GivEnergy All in One battery is an innovative new home battery storage system that combines a high-capacity battery and AC coupled inverter into one integrated product. With a substantial 13.5kWh capacity and the ability to deliver up to 7.2kW of peak power, this British-made battery offers exceptional performance and value for money.

The installation of the GivEnergy all in one and Battery involves an initial investment that includes the cost of the hardware, solar panels, inverters, and the energy storage system. While the upfront costs may seem significant, it's crucial to consider the long-term benefits, including reduced electricity bills, potential
