

How to use the energy cells obtained by reputation level

How do you get reputation?

Reputation can be obtained from completing bounties, requests, world exploration, and quests. Rewards include Recipes, Forging Blueprints, Crafting Blueprints, Namecards, and Wind Gliders. Unlocking the Reputation system in each nation requires Adventure Rank 25 and completing the following quests:

How does reputation work in Liyue?

Which, in turn, will unlock new items, recipes, and more. Reputation is split across all the available nations within the game, so if you have done lots of reputation commissions in Liyue, it means diddly squat in Sumeru, for example. So you'll have to split your time equally between all the key areas of the map.

How does the reputation system work?

The Reputation System rewards players for exploring and doing specific activities within a region. Each of the released regions has their own Reputation system with their own sets of rewards! Each region has its own point system and progress between each region's Reputation System is separated. The rewards are also unique per region!

What is a good energy recharge stat?

The higher your Energy Recharge stat, the faster your Elemental Bursts will charge up! The base Energy Recharge stat is 100%, and you can increase this with artifacts, weapons, or character ascensions. A good Energy Recharge stat would be around 150%~200%, since that lets you use your Elemental Bursts freely!

What are Elemental Particles?

How do you get reputation points in Genshin Impact?

Complete puzzles, open chests, and collect the regional Occulus in order to increase the exploration percent of a region! Get it to a specific percent and you will get Reputation Points! What Is Genshin Impact? Have some feedback? [Click here Reputation System Guide for Genshin Impact.](#)

How do you calculate energy regenerated?

Energy regenerated this way is depending on each character's Energy Recharge stat. Energy Recharge is an independent multiplier. Meaning that the number in Energy column multiplying Energy Recharge % directly will be the Energy regenerated for the character. Eg $1.81 \times 200\% = 3.62$.

In Version 1.1, we will unveil a brand-new system called City Reputation. By interacting with certain NPCs, you will be able to accept requests to complete and increase your Reputation.
