

# How to use up the battery

How do I maximize my battery power?

Dimming the brightness on your screen, using power saver mode and closing your apps are just a few ways to maximize your battery power.

How do I keep my laptop battery healthy?

Resist the urge to keep your laptop perpetually plugged in, as this can lead to overcharging and reduce the battery's overall lifespan. Instead, aim to discharge the battery to around 20-30% before recharging it back to 100%. This balanced approach will help maintain the battery's health and ensure you get the most out of each charge.

How to increase battery life on a laptop?

Maximizing your laptop's battery life requires a combination of great propensities, appropriate settings, and periodic support. By altering control settings, decreasing brightness, closing pointless apps, and keeping your tablet cool, you can essentially expand the time between charges.

How can I extend my laptop's battery life?

Optimizing power settings is one of the fastest and most straightforward ways to extend your laptop's battery life. Most laptops come with built-in power-saving modes that adjust performance to save energy. Here's what you can do:

How do you store a battery?

Store your device with the battery charged to below 50% but not completely drained. Batteries that are more fully charged and then stored may lose capacity faster. If you need to store your device for a long period of time, it's best to make sure the battery level is below 50% but not completely drained before storing your device.

How do I keep my laptop battery from draining?

For example, heat is a battery's worst enemy. You should avoid leaving your laptop in direct summer sunlight or very hot cars. It's also a good idea to charge your laptop frequently -- it's better to top it off more often than to always let it drain down to 0%. However, you might preserve your battery power by only charging it to 80%.

You can change the setting by clicking Set it up now in the pop-up message, then close the dialog window. Move the mouse cursor over the Tray icon and right-click the Battery icon to select the mode you want to use. The current mode can be confirmed by the color shown in the Tray icon. A.
