

Jamaica Power Plant Energy Storage Tender Information

Can JPS distribute electricity in Jamaica?

While Jamaica has several firms that generate electricity, only JPS can distribute the power, due to its exclusive licence with the Jamaican government as operator of the national grid.

Why is Jamaica resetting its renewables target?

Jamaica's energy grid is now dominated by liquefied natural gas and oil. The prices of those fossils have spiked since the onset of the pandemic. And within that time, the Jamaican government reset its renewables target from 30 per cent to 50 per cent.

How long does a solar project last in Jamaica?

Solar projects must be operational within 24 months, while others have up to 30 months. Successful bidders will enter into a 20-year power purchase agreement with the Jamaica Public Service Company. The bid submission window is from January 25, 2024, to February 1, 2024. Loading...

Why did Jamaica's fuel prices spike in 2022?

The price is expected to cut into the country's fuel import bill, which rose to US\$2.38 billion in 2022, up from US\$1.54 billion the previous year, according to the Economic and Social Survey Jamaica report produced by the Planning Institute of Jamaica. The price spikes were linked to the Russian invasion of Ukraine and related sanctions.

When will JPS build a solar PV plant?

By December 2024, the JPS will choose an engineering firm to build the plants. That firm will oversee the construction activity until 2027. The solar PV plant is slated to start construction in 2025 to 2026, while the BESS and wind projects are start in 2025 to 2027.

POWER UTILITY Jamaica Public Service Company, JPS, plans to add nearly 300 megawatts of energy to the national electricity grid in support of the government's 50 per cent renewable energy target.
