

# Solar power generation tax payment process

Can I get a tax credit for solar energy?

There are two tax credits available for businesses and other entities like nonprofits and local and tribal governments that purchase solar energy systems (see the Homeowner's Guide to the Federal Tax Credit for Solar Photovoltaics for information for individuals):

Can a manufacturer transfer a solar tax credit?

Transfer of credit: Manufacturers may also elect to transfer all, or a portion, of the tax credits for a given year to an unrelated eligible taxpayer. See Federal Solar Tax Credits for Businesses for an in-depth discussion of Transfer of Credit options for tax-exempt organizations.

Is the federal solar tax credit refundable?

In 2020 - 2021, the ITC was reduced to 26%. The Inflation Reduction Act of 2022 reinstated and renamed the program the Federal Solar Tax Credit (now known as the Clean Residential Energy Credit) and raised the credit back up to 30%. The Residential Clean Energy Credit is non-refundable.

Do 17-year-old solar systems qualify for the federal solar tax credit?

If you're wondering why 17-year-old solar systems qualify, that's because the Federal Solar Tax Credit isn't actually new. A virtually identical program offering a 30% tax credit called the Solar Investment Tax Credit was available for residential solar power systems from 2006 - 2019.

Can a business claim a solar investment tax credit?

Businesses looking to embrace solar energy can also take advantage of the Commercial Solar Investment Tax Credit. Under this program, commercial entities can claim a 30% tax credit for qualified solar projects. This credit applies to both the purchase and installation costs of solar energy systems.

Can a solar project be tax deductible?

Under this program, eligible taxpayers can claim a percentage of their solar system's cost as a tax credit. Currently, the ITC offers a 30% credit for commercial, governmental and non-profit solar projects that are placed in service in 2022 or later and begin construction before 2033, according to the Department of Energy.

Manufacturers are eligible for two federal tax credits that support clean energy manufacturing in the United States: the Advanced Manufacturing Production Tax Credit (45X MPTC) and the Advanced Energy Project Investment Tax Credit ...
