

# Swedish lithium battery charging cabinet store

What types of storage cabinets are available for lithium-ion batteries?

Various cabinet sizes and equipment variants are available for the safe storage of lithium-ion batteries. There are safety cabinets that are used exclusively for the passive storage of batteries, as well as those that allow both the storage and charging of lithium-ion batteries.

Are there safety cabinets for lithium ion batteries?

There are safety cabinets that are used exclusively for the passive storage of batteries, as well as those that allow both the storage and charging of lithium-ion batteries. ION-LINE passive storage safety cabinets offer a standard 90-minute fire resistance rating both from the outside to the inside and vice versa.

Are Asecos Ion-line lithium cabinets safe?

Discover the Asecos ION-LINE lithium cabinets for the safe storage and charging of lithium-ion batteries in a fire-protected environment. The ION-LINE cabinet models are specifically designed to meet the highest safety standards. They offer certified fire protection with a 90-minute fire resistance rating from the inside out and outside in.

Why do you need a lithium ion battery cabinet?

These cabinets effectively prevent a fire from spreading from the outside to the batteries stored inside. At the same time, the risk of a fire inside the cabinet caused by the lithium-ion batteries or accumulators is also minimised because spread to the surrounding area is prevented.

What happens if a lithium battery is stored in a Nios Safety Cabinet?

If a fire breaks out in a building where lithium batteries are stored in a DENIOS safety cabinet, the fire brigade will have at least 90 minutes to evacuate people and an escalation of the fire due to ignition or explosion of lithium batteries in the enclosed cabinet can be avoided.

What is a battery line safety storage cabinet?

The BATTERY line safety storage cabinets are specially designed for safe storage and charging of lithium-ion batteries.
