

# The power supply battery is out of power and cannot be turned on

Why does my notebook not start with battery connected?

If the notebook won't start with the battery connected and the battery won't charge, it should be the first thing in the troubleshooting tree to try. If that does not work, it means that the power connector cable may have failed. There is a remove replace/video for that on the link I provided earlier. It is a simple replacement.

Why is my laptop not powering on?

Verify that the power supply voltage switch is correctly set if you're on a desktop. If the input voltage for the power supply unit (PSU) does not match the correct setting for your country, your computer may not power on at all. Remove the main battery in the laptop or tablet and try using AC power only.

Why is my computer refusing to start with a power supply?

However, the computer refusing to start with a power supply you know works is a sign that something else is wrong with the machine. At this point, consider removing everything except one component that plugs into the PSU. Try to turn it on and see whether it works. If it doesn't, remove the power to that component and plug in the next.

What if my Dell laptop turns on without a battery?

Refer to the laptop's user guide or service manual. If the laptop turns on without the battery, contact Dell Technical Support to explore repair options available in your location based on your device's warranty status. Real-time clock (RTC) reset restores the BIOS to factory default settings and resets the date and time.

How do I fix a faulty power supply?

If it is set it to stock speeds. Also can try a motherboard BIOS reset, unplug system, remove the CMOS battery and hold in the power button for about 15 seconds. Plug things back in see if it works better. If it still does the shut off, try another power supply. Corsair CX is probably the cheapest good quality one. Sounds like a power supply issue.

Why is my laptop not charging?

Try plugging in the laptop without the battery. If your laptop has a removable battery, it's possible the battery is the reason it won't turn on or won't charge. Remove the battery, connect the power charger, and see if the laptop will turn on. If it works without the battery, try replacing the battery.

3 ???&#0183; If your laptop has a removable battery, it's possible the battery is the reason it won't turn on or won't charge.
